• DISTINGUISHED SPEAKERS • ENGAGING PANEL DISCUSSIONS

ABOUT THE EVENT

Demand from all stakeholders for ESG implementation by corporates is on the rise more than ever. Amongst the most demanding ones are the customers and capital providers. On B2B front sourcing from ESG compliant suppliers is mandatory now, while even the retail customers have become aware of ESG labels on the brands they select. Funding agencies are getting more stringent about providing capital only to ESG compliant applicants even at the cost of delaying and denying funding.

ESG is a reality for every corporate and financial institution! In earnings calls a special section is reserved for covering ESG issues and at AGMs the most favourite subject is CSR and ESG. The purpose of this seminar is to establish that we can do well while doing good. Business models must pivot to this paradigm.

All this necessitates not only speedy execution of ESG, but full compliance and timely reporting too. Now the choice of following ESG is not there since it is being mandated globally by regulatory authorities too, the ESG game is now all about agility and hence the title of our seminar ie Mastering ESG Agility.
