## Invitation

*"Sustainability is the concept of delicately balancing the economic prosperity of an organisation, its environment responsibility, its social equity to give the organisation an edge over its competitors"*

**Justice M. N. Venkatachaliah**  
Chairman, Institute Of Directors

Dear Friends,

I have pleasure in inviting you to the 18<sup>th</sup> World Congress on Environment Management being organized on 8-9 July, 2016, in New Delhi, with the Theme : **"Environment and Climate Change – Transitioning to a Sustainable Economy"**.

Two significant events that will impact the future course of global development have taken place during 2015. The first was the UN 'Sustainable Development Goals' and the 'Agenda 2030' and the second was the 'Paris Climate Change Agreement' (COP 21). The Agreement has been ratified on 22 April 2016 in New York. India played an important role in both these agreements, and is committed to the targets. A major element in these agreements is the role of business and industry as partners with Govts.

20<sup>th</sup> century was marked by both, the recognition and creation of a host of environmental problems. The 21<sup>st</sup> Century now bears the burden of resolving these problems, and preventing the emergence of more. Disaster management failed, showing gaping holes and inadequate relief and rescue, in the 2013's Tsunami, recent floods and the spate of earthquakes all over the world.

Green is the most relevant word today. 'Going green' has assumed a whole new meaning, with corporates adopting green economy and using social media, to reach out to their consumers. It would be essential, to consider options that would make growth more inclusive and sustainable - in other words, a green economy.

The conservation of Nature and protection of our environment is a collective task, involving citizens and government, the corporate sector and all other stakeholders in our complex and diverse society. Today, we face unprecedented environmental challenges such as climate change, biodiversity loss, pollution and resource scarcity.

IOD looks forward to welcoming your participation in this collective solution oriented Sustainability effort.

Best wishes,

M. N. Venkatachaliah

### Objectives

- i. Integrate Paris Climate Change Agreement in Development Agenda.
- ii. Promote transformational leadership for climate change, mitigation and adaptation.
- iii. Outline Road Map to integrate Green Growth Solutions in Board Room decisions.
- iv. Evolve Market Solutions for strategic and operational environmental challenges.
- v. Promote Sustainable patterns of consumption and production.
- vi. Support integrated governance of economic, social and environmental aspects.
- vii. Develop strategy for conservation and efficient use of natural resources.
