

## Annual Directors' Conclave 2022

### Concept Note

---

#### **TOP TRENDS FOR BUILDING TOMORROW'S CORPORATE BOARDS**

Even the most agile organisations and boards are being consistently challenged, as the business and economic landscape remains complex in the face of emerging challenges and shifts in the global economic balance. Across geographies, we are also witnessing the emergence of top trends including ESG, cybersecurity, data governance, digital transformations, and disruptive technologies.

Recalibrating leadership is the need of the hour, in order to reaming on top of emerging trends and challenges, alike. It is in times such as these wherein lies the 'moment for leadership', to transform their organisations, with innovative strategies, policies and frameworks that will build resilient organisations for long-term sustained success, on the other side of these unprecedented challenges and macro-economic megatrends upending the global business environment.
