

INVITATION

CORPORATE GOVERNANCE AND ELECTRONIC STRATEGIES AS RELATED TO ERP

E-government agencies in developed and developing countries are anticipating efficiency and effectiveness gains from the evolution of new e-business models. Such agencies are attempting to adopt and adapt the new technologies to public e-business in order to achieve the benefits being realised by entities in the private sector. The adoption of Enterprise Resource Planning (ERP) is one of these e-business models. The purpose of this session is to explore and open the discussion on the challenges and opportunities for the adoption of ERP by large corporates and government agencies, and how to avoid unnecessary expense and achieve an efficient and effective outcome in minimum time.

Date:
Tuesday, 25th August 2015

Time:

Seminar Presenter

Prof Doug Thomson
RMIT University, Melbourne, Australia

He was a Principal Consultant to BHP Billiton for almost 3 years from 2000 as a team member of its global HQ e-business strategy group in Melbourne developing e-marketplaces (NZ Steel, corProcure, Quadrem), BHP's e-business road map, e-retailing of Ekarti diamonds over the net, e-supply chains, and e-reverse auctions, and subsequently with other corporations.

Since 2005 he has delivered global business, business operations, marketing, organizational behaviour, corporate and business strategy, project management and supply chain logistics courses into the MBA and other educational programs in Melbourne, Hong Kong, Malaysia, France and Vietnam, and was for two years, manager of RMIT's MBA programs.
