Invitation

Dear Friends,

The world has a climate emergency – “a code red for humanity” according to the UN Secretary-General. The concentration of greenhouse gas (GHG) emissions in the atmosphere is wreaking havoc across the world and threatening lives, economies, health and food. Most advanced countries have committed to be Net Zero by 2050. India has committed to be Net Zero by 2070.

By 2050, the world population is predicted to rise to around 10 billion. Unprecedented, complex, non-linear changes in the earth's systems, rising global temperatures, leading to more frequent heat waves and other extreme weather calamities will further affect water and food scarcity.

Our cities are choking under smog, rivers are polluted and clogged. Conservation of nature and protection of our global environment is a collective task, involving citizens and government, the corporate sector and all other stake-holders in our complex and diverse society. As per a recent World Bank study, environmental degradation costs India \$ 80 billion a year.

To discuss current Environmental Challenges, Institute of Directors, India is organizing the 23rd World Congress on Environment Management and Climate Change in Bengaluru on August 25 – 26, 2022 with the theme **"Promoting Climate-Resilient Economic Growth through effective Leadership and Board Strategy"**.

IOD looks forward to welcome your participation in our endeavour to further develop a corporate leadership that would not only be environmentally sensitive, but also empathetic towards humanity affected by imminent climate change concerns and carve out collective market oriented solutions for building sustainable and environmentally friendly organisations.

Regards,

M. N. Venkatchaliah
