

## Dubai based Tristar Group extends support towards India's fight against Covid-19

150 Oxygen concentrators donated to St. Martha's Hospital, Bengaluru

**Eugene Mayne**

Founder & CEO, Tristar Group, UAE

**(Dubai, UAE) May 10, 2021:** Tristar Group ("Tristar" or "the Company"), the global integrated energy logistics company based in Dubai, has flown 150 sets of oxygen concentrators to St. Martha's Hospital, Nrupathunga Road in Bengaluru, India, to support the state's battle against the Covid-19 pandemic.

Each unit donated is a compact oxygen machine that can provide respiratory therapy for those who may require five litres or less of oxygen flow. The oxygen concentrators, Respiroics EverFlo, are lightweight at only 14 kilograms, and emit less than 45 dBA. With a compact, ergonomic design that uses less space and energy, and produces less heat, the oxygen concentrators are ideal to provide some relief in India's crowded hospitals and healthcare centres, as the country continues to fight against the pandemic.

**Eugene Mayne, Group CEO of Tristar said:** "It's a difficult time for us to see our country men and women battling against all odds to save lives and we hope that this small initiative will provide much needed recourse to hundreds of people who are in need of oxygen to breathe which is a universal right for every human being. We are a business for purpose and saving lives is an integral part of our corporate strategy."

We hope that this small gesture of support will provide some relief to all those suffering during this difficult time. Our thoughts and prayers are with our fellow citizens in India."

### About Tristar:

Tristar is a global business, headquartered in Dubai, which offers end to end fuel logistics solutions to blue-chip clients including international and national oil companies and intergovernmental organizations. Its integrated energy logistics platform spans road and maritime transportation, specialized warehousing, fuel farms, commercial aviation refueling and fuel supply operations.

It operates in 21 countries and territories across 3 continents and has over 20 years proven legacy of operational quality making it a partner of choice to its customers, with a track record of profitable growth. The company operates to the highest international health, safety, environmental and compliance standards and receives awards for its exemplary record of operational and safety excellence, as well as sustainability initiatives.
